

Farm Site Map

Please provide a rough drawing of your farm operation. It does not have to be to scale but approximate location and size in relationship to other buildings would be helpful. Assessors will be using this diagram during the on-site assessment to review your farm operation and for reference to ensure all areas for potential energy consumptions are recorded. Please label all buildings (e.g. broiler or farrowing barn, milking parlour, farm house, garage, workshop, storage tanks, etc). Where possible, include the location of doorways, ventilation fans, windows, water well/dugouts etc. Refer to the key below to sketch your operation. Thank you.

Name:	Daytime Telephone:
Legal Land Description:	Farm Name:
Water Source: dugout OR well (please circle)	Depth of Water Intake Pipe at Source:

NORTH

Key:	Main Doors	Ventilation Fans	Water Source (e.g. dugout or well):
	Windows	Ventilation Windows	

Application Form and Agreement

Application Requirements and Terms and Conditions

- Producer will provide a site map of operations complete with a list of buildings and functions.
- Producer will provide energy bills (electricity and natural gas) for 12 consecutive months prior to assessment date.
- Producer will be available for an on-site interview with energy assessors during the assessment process.
- Producer agrees to participate in a follow-up survey.
- Producer will pay \$200 towards the total assessment cost of \$1,800.
- Producer has signed the Biosecurity form.
- Producer agrees that all legal liabilities respecting any results arising from the assessment will remain with the contractor. C3 nor AF will be held responsible nor warranty any results from the program.
- Producer will allow the OnFarm program to use data for the purpose of creating anonymous energy profiles. Only aggregate data will be communicated, no individual operational data will be disclosed.

Privacy Statement

Individual and/or operational data and information collected and analyzed for the purposes of the OnFarm Program will not be re-distributed or shared within the public domain. Data, information and analysis will only be used aggregately for benchmarking, and policy and program development.

I have:

- Enclosed a cheque for \$200 made out to **Climate Change Central re: OnFarm Program**
- Provided electricity and natural gas bills from the last 12 months
- Enclosed a site map
- Read the Biosecurity document

I (Please print) _____, have answered all questions truthfully and to the best of my knowledge.
